## MODULE 4 — Digit Extraction and Number Manipulation

**Question:** A. Digit Sum

**Platform:** HackerEarth

**Problem Link:** [A. Digit Sum]

**C Source Code:**

```c
#include <stdio.h>

int main(){
    int t, n;
    scanf("%d", &t);

    while (t--) {
        scanf("%d", &n);

        int last = n % 10;

        while (n >= 10) {
            n /= 10;
        }

        printf("%d\\n", n + last);
    }

    return 0;
}
```
