MODULE 4 — Digit Extraction and Number Manipulation

Question: Find Digits

Platform: HackerRank

Problem Link: [Find Digits]

C Source Code:

```
int findDigits(int n) {
    int original = n;
    int count = 0;

    while (n > 0) {
        int digit = n % 10;

        if (digit != 0 && original % digit == 0) {
            count++;
        }

        n /= 10;
    }

    return count;
}
```
