MODULE 1 — Basic input and output

Question: Total Distance Traveled

Platform: LeetCode

Problem Link: [Total Distance Traveled]

C Source Code:

```
int distanceTraveled(int mainTank, int additionalTank) {
    int distance = 0;
    int consumed = 0;

    while (mainTank > 0) {
        mainTank--;
        consumed++;
        distance += 10;

        if (consumed % 5 == 0 && additionalTank > 0) {
            mainTank++;
            additionalTank--;
        }
    }

    return distance;
}
```
